

Test Plan – SauceDemo

Shofia Atika Nadhira

1. Introduction

SauceDemo is a web-based e-commerce demo application used to practice software testing. This project focuses on validating the application's core user flows, including authentication, product browsing, shopping cart, and checkout.

2. Test Objectives

Testing is conducted to:

- Ensure the application's main functions operate according to the expected behavior
- Identify defects in the tested functions and user flows
- Ensure that fixed defects can be verified through retesting
- Ensure that changes do not introduce regression in related functions
- Evaluate usability and UI consistency within the defined scope

3. Scope

In Scope:

- Login
- Product Listing
- Product Sorting
- Product Detail
- Shopping Cart
- Checkout
- Logout

Out of Scope:

- API testing
- Performance Testing
- Security penetration testing
- Database testing
- Mobile application testing
- Payment gateway integration

4. Testing Types

For this project:

- Functional testing
- Positive testing
- Negative testing

- Exploratory testing
- UI testing

5. Test Environment

Item	Environment
Application	SauceDemo
OS	macOS
Browser	Google Chrome
Browser Version	Version 152.0.7977.82
Device	Laptop
Network	Wi-Fi

6. Test Data

Data	Value
Valid Username	standard_user
Valid Password	secret_sauce
Invalid Username	Invalid test data
Invalid Password	Invalid test data

7. Entry Criteria

Testing can begin when:

- The application is accessible.
- The test environment is available.
- Test accounts are available.
- The testing scope has been defined.
- Test scenarios and test cases have been prepared.

8. Exit Criteria

Testing is considered complete when:

- All planned test cases have been executed.
- PASS/FAIL results have been documented.
- Identified defects have been reported.
- Defects available for retesting have been verified.
- Regression testing of affected areas has been completed.
- The Test Execution Report has been prepared.

9. Deliverables

- Test Plan
- Test Scenarios
- Test Cases
- Test Execution Report

- Exploratory Testing Report
- Bug Report
- Test Evidence/Screenshots

10. Risks and Mitigation

Risk	Impact	Mitigation
Demo application unavailable	Testing blocked	Document availability issue and resume when accessible
Test data unavailable	Some scenarios cannot be executed	Use available demo credential/test data
Browser compatibility issue	UI behavior may differ	Perform testing on defined supported browser
Defect blocks subsequent testing	Test execution delayed	Mark dependent cases as Blocked and report the defect

11. Test Schedule

Activity	Status
Test Planning	-
Test Case Design	-
Test Execution	-
Exploratory Testing	-
Bug Reporting	-
Retesting	-
Regression Testing	-
Test Summary	-
